The National Skills Academy for Manufacturing sets national standards for manufacturing skills programmes that ensure you get the biggest return on investment from your training.

At the heart of our standard is **THE LEARNING ENGINE**

World class manufacturing requires world class skills. This is the purpose of The National Skills Academy for Manufacturing. With employers firmly in the driving seat we are a **centre of innovation and excellence** for raising standards of skills and work-based learning within UK manufacturing.

## THE LEARNING ENGINE

Enabling economic benefit through powerful work based learning

## Learning Engine Part 1

### Analyse Impartially

Truly understanding the skills you need to deliver your business objectives is critical to your business success

## Learning Engine Part 2

### Prepare Collaboratively

Ensuring both the business and individual understand the training programme and related expectations will deliver superior results for all.

## Learning Engine Part 3

### Deliver Powerfully

Training that is delivered in an engaging informative manner will result in more enjoyment, retention and a better overall result

## Learning Engine Part 4

### Follow through Thoroughly

Ensuring you use any new skill is the vital step in achieving results and striving for excellence

## Learning Engine Part 5

### Evaluate Honestly

Asking how did we do and what can we build on will create the virtuous learning spiral required to move your business and employees to the next level and achieve excellence.
